

# Siemplify ThreatNexus & Symantec DeepSight Intelligence

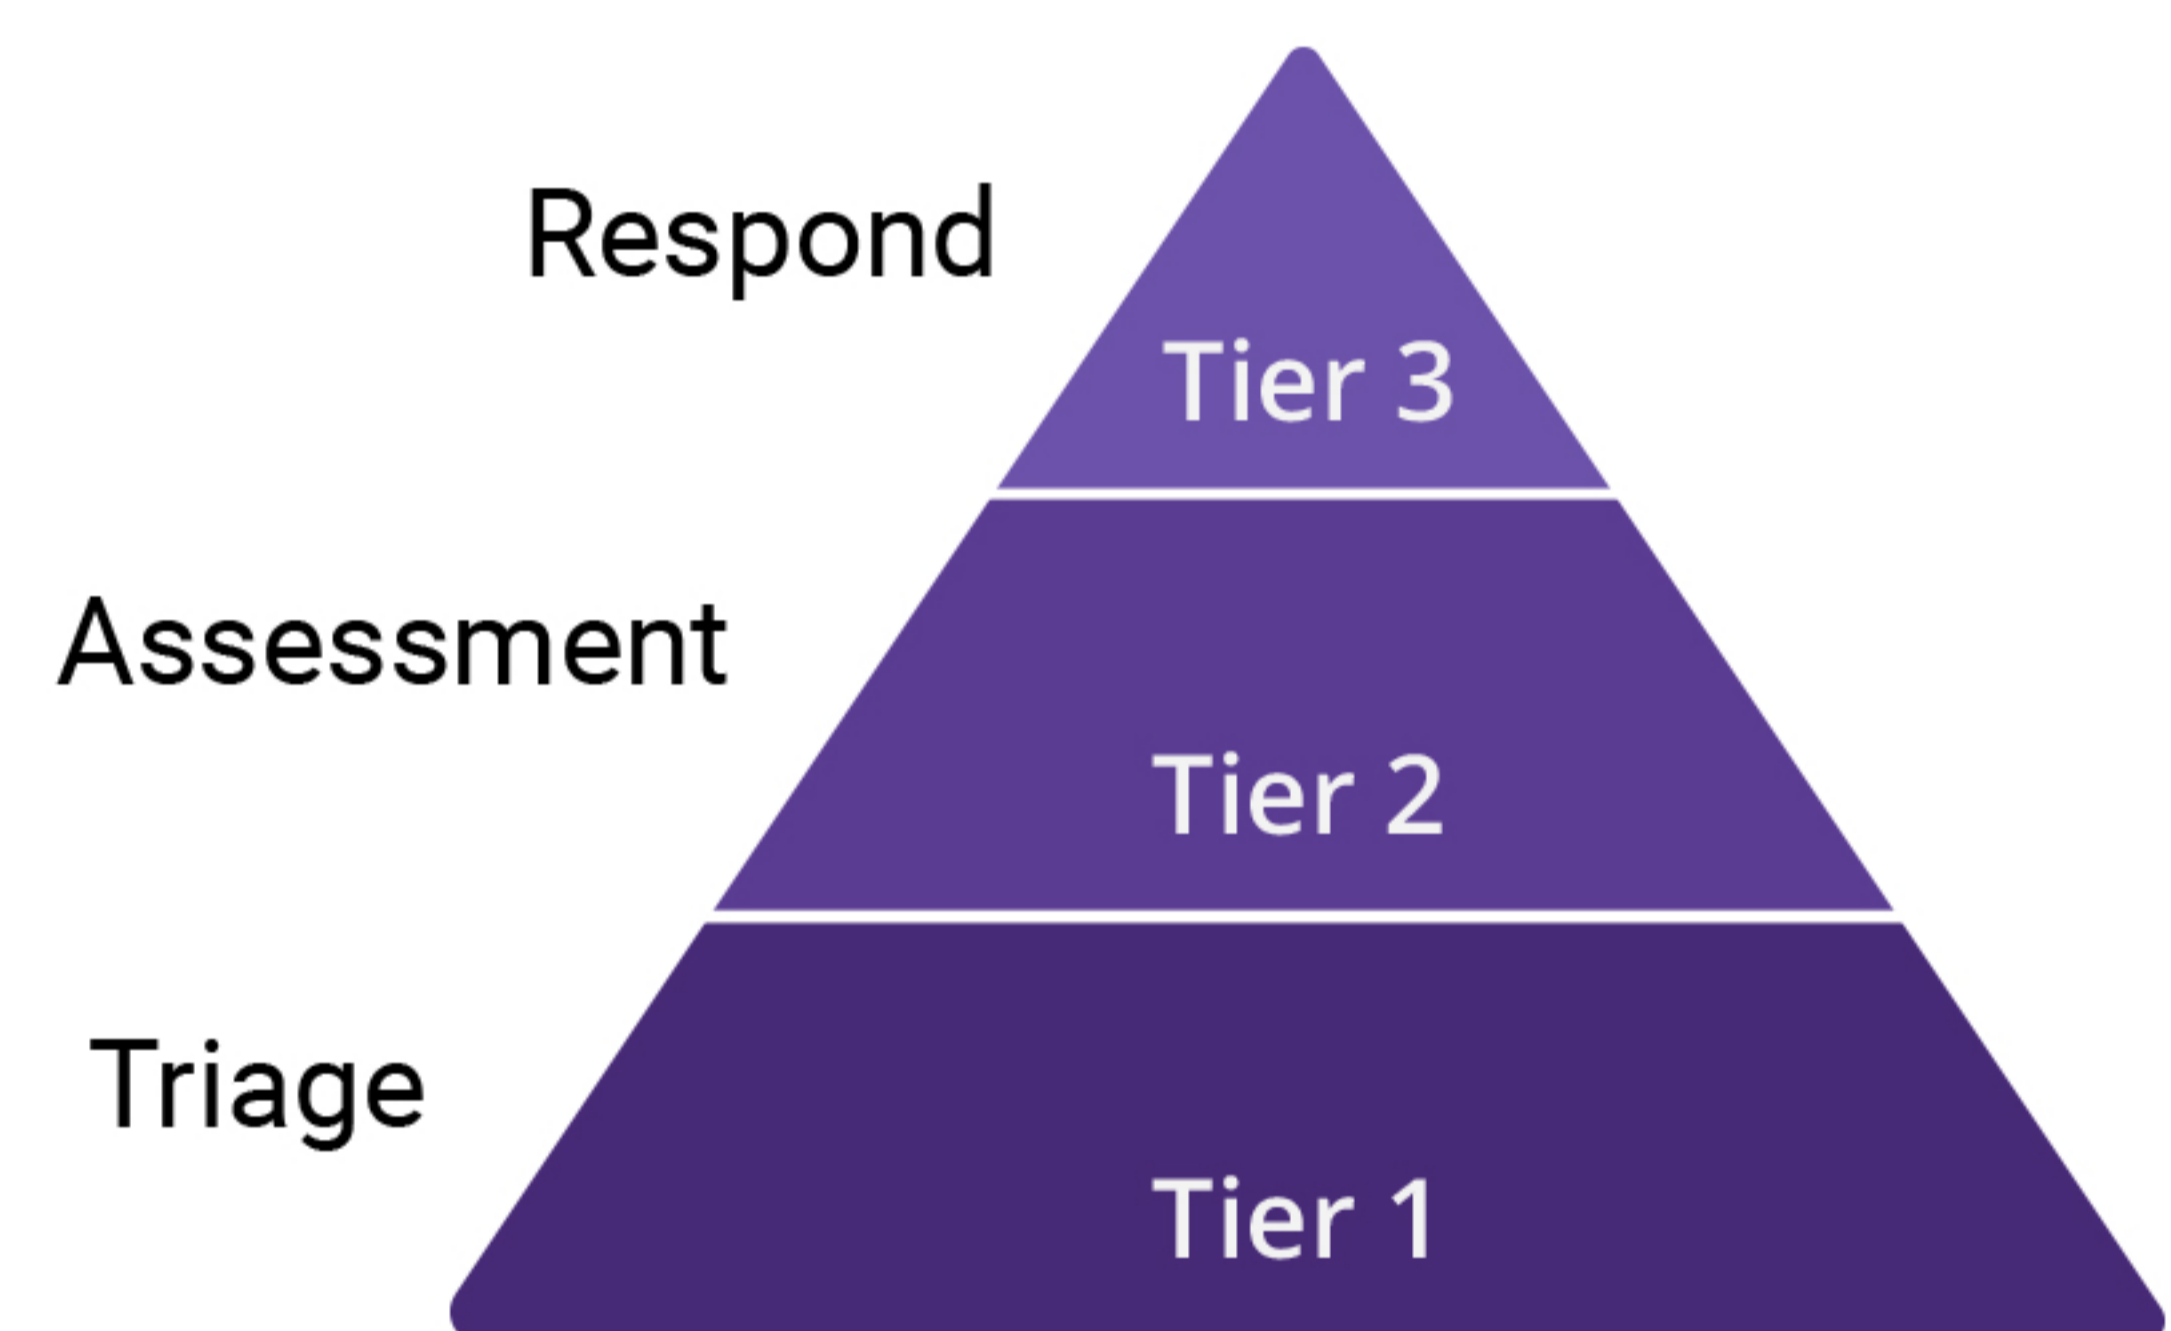

## Integration of Symantec DeepSight™ with Siemplify ThreatNexus leverages the benefits of Symantec intelligence with ThreatNexus security orchestration.

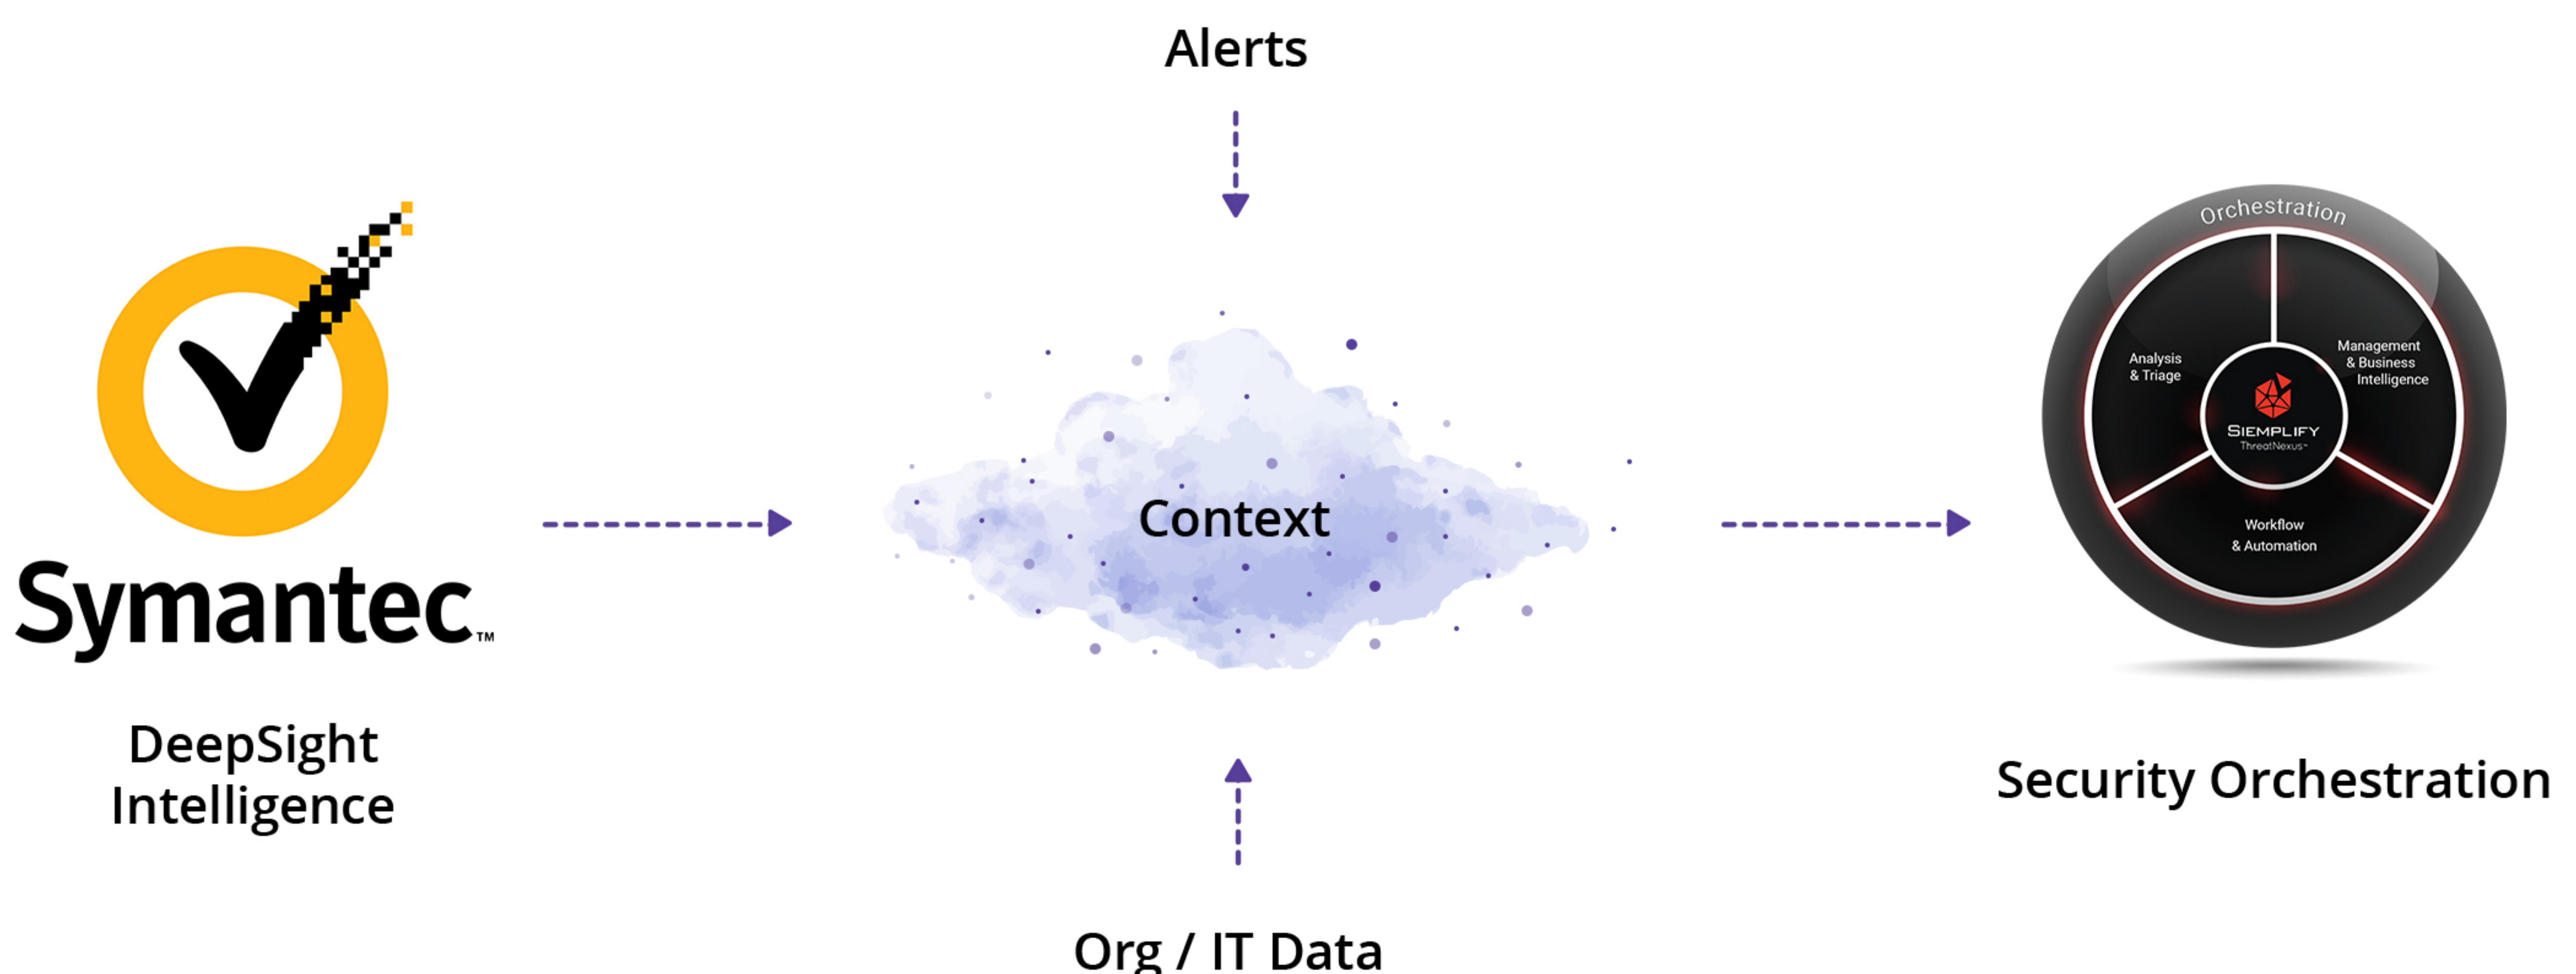

Siemplify has integrated Symantec's DeepSight Threat Intelligence feeds into Siemplify's ThreatNexus™ security orchestration platform. The integrated solution provides security analysts with contextualized and prioritized threat storylines that are automatically enriched with real-time threat intelligence, tightly integrated with the ThreatNexus comprehensive platform for management, automation and investigation.

### The Challenge

- ! Too many alerts
- ! Gathering data necessary to triage volume of alerts is cumbersome
- ! Dependence on manual operations hinders ability to connect threat intelligence to alerts, depriving teams of needed context to rapidly assess severity of a case

### Siemplify and DeepSight together provide the needed context for effective orchestration

## ThreatNexus and DeepSight together address the challenges of today's security operations and accelerate threat response, allowing security operations teams to...

- Apply DeepSight Threat Intelligence across all real-time threat management, investigation and automation activities
- Accelerate the triage process with cases enriched with data across the security footprint
- Automatically visualize and prioritize cases with threat intelligence context
- Enable the rapid investigation of necessary cases with integrated DeepSight Intelligence

### Instant Context

Triage | Assess | Respond | Automate | Manage | Report

### About Siemplify

Siemplify ThreatNexus is an integrated security orchestration platform designed for security teams to manage, investigate, and automate threat response from a single pane of glass. As the primary workbench for analysts, ThreatNexus provides the playbooks to drive consistency throughout the threat management process, delivering measurable ROI. ThreatNexus is the only comprehensive security orchestration platform to provide the full spectrum of case management, automation, and investigation giving analysts the ultimate balance in machine driven and analyst led response.

### About Symantec DeepSight

Symantec DeepSight Intelligence provides actionable information about cyber adversaries, campaigns, threats and vulnerabilities. By integrating DeepSight Intelligence into their existing processes and tools, businesses are able to act appropriately and quickly to prevent security incidents before they happen. DeepSight Intelligence is derived from deep, proprietary analysis of billions of events from the Symantec Global Intelligence Network.
